

# Polyx™ Horizon Slim 50L

Trademark and 2024 ©

Polyx™ Horizon panels feature a series of horizontal grooves that run across the surface, creating a sleek and continuous linear effect. The horizontal orientation of the grooves emphasises the width of the space, adding a sense of expansiveness. Polyx™ Polyester Board is made by a process of tumbling, needle punching, and baking low and high melting point polyester fibres. The high density fibrous network absorbs sounds and reduces reverberation.
