

Polyx™ Loop 600

Trademark and 2024 ©

Polyx™ Loop panels feature circular grooves across the surface, adding depth and rhythm to their design. By arranging the panels in various orientations, you can create a repetitive pattern of intersecting circular and linear grooves, resulting in a richly textured geometric aesthetic. Polyx™ Polyester Board is made by a process of tumbling, needle punching, and baking low and high melting point polyester fibres. The high density fibrous network absorbs sounds and reduces reverberation.
